

# ABRASIVE CLEAN-UP SOLUTION

## Vacuuming Service for Efficient Abrasive Recovery

We offer a tailored vacuum service designed for the UK's foundry and surface preparation sectors. Optimize abrasive recovery, enhance safety, and streamline operations with our innovative and complete service solutions.

Flexible options

High efficiency equipment

Nationwide coverage

### USERS BENEFITS

#### Cost-Effectiveness :

Service pays for itself after reclaiming just a few tons of the abrasive material.

#### Health & Safety Improvement :

Minimize risks associated with manual abrasive recovery methods.

#### Operational Efficiency :

Quick, efficient recovery and cleaning processes lead to reduced downtime and increased productivity.

#### Sustainable solution :

Reclaim and reuse spent shot with our eco-friendly recovery service, ensuring cost-efficiency and reusability of your abrasive media.

### SELF OR FULL SERVICE

**Option 1 : Rental-Only** «Empower your team with our top-tier vacuum units, ready for any DIY abrasive recovery challenge.»

**Option 2 : Rental + W CARE Services** «Leverage our expertise for effortless, professional-grade abrasive recovery, handled by our expert team.»

### SPECIFICATIONS

Leverage the cutting-edge technology of our Vacuum units, each meticulously designed for specific abrasive recovery needs. From versatile spot cleaning to large-scale operations, discover how our equipment's superior specifications can transform your abrasive recovery processes.

**Sacvac Unit :** Versatile on-the-spot cleaning solution.

**High Suction Power :** 18.5kW motor requiring a 5pin 63 amp power supply.

**Vacuum Lift :** Utilizes a 100 mm hose with up to 3000 mm H<sub>2</sub>O lift.

**High Capacity :** Capable of handling 4000kg/hr, with a volume of 875 m<sup>3</sup>.

**Mobility and Ease of Use :** Designed for long-distance vacuuming and user-friendly operation.

**CVac Unit :** Tailored for large-scale, intensive cleaning.

**Powerful Motor :** 17.3kW for demanding tasks.

**Power Supply :** 32 amp with 4 or 5 pin connection.

**Exceptional Vacuum Lift :** Reaches up to 5000mm H<sub>2</sub>O for heavy materials.

**High Airflow :** 720m<sup>3</sup>/hr, enhancing suction efficiency.

**Large Capacity :** 200 liters with Big Bag hooks for less frequent emptying.

**Suction Hose :** 20 meters x 70mm hose for broad material compatibility.

**Advanced Filtration :** Dual-stage system with cyclonic separators and HEPA filters.

**Noise Level :** 77dba, below mandatory 85 dba.

### APPLICATIONS

- **Foundries :** Reclaim valuable abrasives, maintain cleaner facilities, and enhance operational efficiency.
- **Surface Preparation :** Streamline abrasive recovery processes, reducing downtime and labour costs.
